ADVANCED PELTIER TECHNOLOGY

# Peltier-cooled incubator IPPeco

IDEAL FOR CULTIVATION ABOVE AND BELOW ROOM TEMPERATURE,  
DETERMINING COLONY COUNT OR DURABILITY TESTS

Maximum energy efficiency compared to cooled incubators with a compressor.

Absolutely homogeneous distribution of temperature.

Greater range of application thanks to cooling down to the freezing point.

Always a good climate: refrigerant-free, smooth running, compact, low-maintenance.

Model sizes: 30, 55, 110, 260, 410, 750, 1060, 1400, 2200

Temperature adjustment ranges: 0 to +70 °C (IPP110eco - IPP1060eco) | +15 °C to +60 °C (IPP1400eco/IPP2200eco)

## Advanced Peltier Technology

As a technology leader for Peltier laboratory equipment, we set new standards: perfectly coordinated systems and excellent efficiency make the Peltier-cooled incubator IPPeco the ultimate when it comes to energy efficiency and reliability.

## Homogeneous, constant and reproducible

Despite the significantly reduced energy consumption, the IPPeco's performance is impressive. Heating up, cooling down and recovering after the door is opened occur fine-tuned and yet at top speed. The high-precision control guarantees an absolutely homogeneous and stable temperature distribution.

## Appliance comparison shows tremendous potential for energy savings
